What two pieces of information must be known to configure the AP? (Choose two.)A. shared secretB. username and passwordC. RADIUS IP addressD. group nameE. PAC encryption keyAnswer: ACEExplanation:You identify RADIUS security servers by their host name or IP address, host name and specific UDP port numbers, or their IP address and specific UDP port numbers. The combination of the IP address and the UDP port number creates a unique identifier allowing different ports to be individually defined as RADIUS hosts providing a specific AAA service. This unique identifier enables RADIUS requests to be sent to multiple UDP ports on a server at the same IP address.
